Ordering Your Repeat Prescription - Important Changes

Changes to repeat prescription ordering

The way repeat prescriptions are ordered is changing. From **30th June 2019** you will have to **order your repeat prescriptions directly through your GP practice**, and not your high street or internet pharmacy or appliance contractor.

For information about these changes please visit the **West Leicestershire CCG website**, where you can use the menu at the bottom of the screen to select your language: bit.ly/Repeat_Meds

What is changing?

The way repeat prescriptions are ordered is changing. From 30th June 2019 you will have to order your repeat prescriptions directly through the Practice, and not your high street or internet pharmacy or appliance contractor.

What is not changing?

If you already order repeat prescriptions directly through your GP practice this change will not affect you. When you order your repeat prescription directly through the Practice, your pharmacy will continue to collect or receive your prescription as before. Pharmacies may also continue to deliver your prescription if they offer this service.

How do I order my prescription through my GP practice?

You can order repeat prescriptions through the Practice online, by post or in person by using the tick slip, which is the right-hand side of your prescription which lists your current repeat medication. Find out more on the West Leicestershire CCG website:
